#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 23 October 2003.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Detail d Action***

The following is responsive to the amendment received Oct. 23, 2003.

Claims 1-8 and 14-16 are cancelled without prejudice or disclaimer. No new claims are added. Claims 9-13 are currently pending.

Applicant's amendment and the claims contained therein have been reconsidered with the Primary Examiner, and in view of such reconsideration it has been determined that prosecution must be revisited.

The finality of the office action mailed April 18, 2003 is withdrawn.

The previous claim objection and rejection set forth in paragraphs 1-3 of the office action mailed April 18, 2003 **are withdrawn** in view of Applicant's amendment and the remarks contained therein.

***Restriction/Election***

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

the androgenic dependent diseases as set forth in claim 11 as well as the specific species of NK-3 antagonists disclosed in the specification at pages 4-5. Applicant is respectfully requested to elect a single disease as well as a single NK-3 antagonist compound. To assist the Examiner in the search of the compound, the

Examiner respectfully requests that Applicant submit a structural drawing of the elected compound.

2. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claim 11 corresponds to the species of diseases listed above.

Claims 9, 12, 13 correspond to the disclosed NK-3 compounds disclosed in the specification.

The following claim(s) are generic: claims 9, 12, 13.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The specific diseases lack the same or corresponding special technical feature because each

disease is distinct even though they may be characterized by androgenic dependency. Each disease would require different treatment steps and the search for one is not required for the other. Concerning the specific NK-3 antagonists described in the specification, although these compounds may "function" as NK-3 antagonists, each compound is chemically and structurally distinct and the search for one is not required for the other.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cybille Delacroix-Muirheid whose telephone number is 703-306-3227. The examiner can normally be reached on Mon-Fri from 9:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
